

UPP Dispenser Sump Range - Wide Access

A new comprehensive range of wide access sumps has been added to the UPP range.

The new sumps have many features not currently found on existing sumps and have been designed to accommodate the Gilbarco SK700 and the Wayne Global H Frame and CXX-11, CXX-21, CXX-31 and CXX-44 Dispensers for Shell and BP.

The new range are of the same design as the DS2711 vista sump.

Key Features:

- Rigid HDPE body.
- Reinforced contoured structure.
- C channel moulded into the sump:
NO bolt holes required in the sump wall.
- Mounting frame with conduit entry.
- Stabiliser bars feature pre-drilled shear valve mounting plate and spring channel nuts.

Key Benefits:

- Resists ground movement and hydrostatic pressure.
- No Leak Paths - one system when using UPP EIF entry seals.
- Vacuum testable.
- Conduit can enter the dispenser without penetrating the sump wall.
- Efficient installation.
- No need to adjust height of sump and accommodate fall back of pipe line.
- Compatible with all UPP electro-fusion and mechanical entry seals.

New Dispenser Sumps
